DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, drawn to an image forming apparatus having independently removable developing units from a main frame, classified in class 399, subclass 119.
 - II. Claims 26-30, drawn to an image forming apparatus having a particular shutter structure, classified in class 399, subclass 114.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, in invention II, the shutter structure can be used independently of the removable developing units and has separate utility such as in an imaging apparatus where the developing units are not independently removable. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
